

Based on a recent review completed by the Michigan State Police (MSP), the Lapeer County Road Commission (CRC) is in the process of removing invalid speed zones within your Township. Please provide the following information to anyone within your organization that you feel would benefit from this information.

Summary

In January 2023, the Michigan State Police reviewed the Speed Zones currently in place within the Lapeer CRC's jurisdiction. This review was prompted by State protocol, which requests that every 10 years, the Michigan State Police completes a random sampling of the speed zones. Once they started their review, it became apparent that past Traffic Control Orders (mostly late 1980's to early 2000's) did not follow the correct format for the Speed Zone paperwork.

The zones identified having incorrect paperwork were deemed invalid and must be removed. A new speed study may not be requested until after the signs have been removed for a minimum of 90 days.

Based on the MSP findings, 30 zones (county-wide) were found to be invalid. **Within Hadley Township, the zones identified for removal are:**

- **Fox Lake Road – 45 mph - Honert Road and Hadley Road**
- **Pratt Road – 25 mph - west and east of Hadley Road**
- **Hadley Road – 25 mph – south and north of Pratt Road**
- **Hadley Road – 35 mph – 1,750-ft to 3,000-ft south of Pratt Road**

Attached to this email, for your staff's use, is:

- A county map of the zones being removed vs. the zones staying in place (color coded by speed)
- A county-wide list of the road names and zone limits being removed

If you or your residents have any other questions, or need additional information, please have them contact me. My direct contact information is provided below. Thank you.

Sincerely,
